

## News Release

### **Procurri Announces Expansion in Malaysia With New Office Space to Support Growth**

*New office in Petaling Jaya bolsters regional warehouse and customer support facilities; accelerates global growth strategy*

**Kuala Lumpur, 9 September 2015** – Procurri Corporation Pte Ltd (“Procurri” or the “Group”), the global independent distributor of data centre equipment and multi-vendor maintenance provider, today announces the relocation to a new office in Malaysia. The new 12,000 sq. ft. office located in Petaling Jaya, will accommodate our rapid growth and future expansion plans. Beyond serving as another key warehouse for our data centre equipment across Asia Pacific, the new office will provide capacity for increased customer call support, engineering and staging facilities as well as sales and service functions across Procurri globally.

Mr. Poh Yee Tiong, Head of Procurri’s Asia Pacific operations, said: “The move is aligned with our current and future growth plans to develop the Malaysia and global operations. Our global reach and capabilities since our integration with our sister companies in Singapore, the US and UK have allowed the Malaysia office to capture significant opportunities from multinational companies who are fast expanding in the country. Our team is excited about the growth we are experiencing and this move represents a commitment to continue to build on the success of our Malaysia operations.”

Many multinational corporations, cloud and managed services providers as well as valued added resellers in the region have come on board with Procurri Malaysia since the office went global, with customers in the consumer, manufacturing, telecommunications and data centre industries.

The expansion of our Malaysia office further accelerates the Group’s ambitious growth plans following the recent opening of an office in Mexico to tap into the opportunities in emerging and semi-developed markets.

“In Malaysia, we are focused on expanding our reach across untapped industries / segments such as the healthcare and financial services sectors via an aggressive channel strategy and supply chain expertise to capture the growing demand for nation-wide, regional and global support in IT asset recovery and independent maintenance”, said Mr. Poh.

Procurri's reach spans across 80 countries globally, offering multi-country localised services in IT distribution and asset recovery, hardware maintenance, infrastructure-as-a-service, data centre relocation and other lifecycle services.
